Subject: microsoft settlement

hi

it is time to stop the endlewss lawsuits

all levels of government should cease trying to grab a tobacco type bonanza from microsoft, in fact the y would be better srerved crafting some legislation that would prevent these types of laywer employment suits from being initiated

in my opinion the various state DA's use this case and others to further their on carears at the expense of the public and the victim corporations

the DA's should be jailed for misuse of public funds
